

## South African Music for Europe

Stuttgart, Germany, 2<sup>nd</sup> March 2009

### License your Music to the European Media Industries

The Soundarchive GmbH specialises in the distribution of music and the licence-trade of music for film producers and advertising companies. An integrated publishing house regulates contract issues with the composers and licensors. The innovative Website SCORBE.com offers artists, musicians and composers exceptional marketing opportunities for their music.

In addition, we offer music consulting services. Our Music Supervisors work in a direct contact with media companies in the stronghold of media production in Germany, Austria and Switzerland. Also we have direct channels to other European markets.

### Focus South Africa

The World Championship 2010 starts in about 15 months! An extensive amount of documentaries, TV commercials, TV shows and other films, trailers and spots will be produced over here – synchronized with South African music!

Therefore we currently built up an eclectic and sophisticated South Africa Special. And we want you to be part of it.

### What do we offer?

- Individual presentation on the artist pages of our website
- Implementation of all tracks individually in the data base of our website with detailed track description
- Direct marketing and distribution activities in the territory of Germany/Austria/Switzerland
- Distribution via our partners in other important European markets
- Fair conditions and transparent agreements
- Payout of the license fees on a monthly base
- Controlling and monthly reporting
- Controlling of the announcements to the music rights organisations
- As a sub-publisher we can also take care of digital distribution if desired and open further distribution channels to the consumer market

### What are we looking for?

We are looking for authentic music from South African artists. Both traditional music and music with kind of a South African touch, even if it's just the origin vocals or one single instrument that gives us the feeling of South Africa. It can be Jazz, Pop, Rock, Hip Hop, R&B, or any other style. We're open and quite happy to listen to all the music. So don't worry to let us hear whatever you want us to listen to. No matter if you are a super star or a newcomer. We also include fancy, unusual titles in our repertoire. Nothing ventured, nothing gained!
